

FLYLOW

moun•tain•neer•ing | ,mountn 'i(ə)ri nɔ|

noun:

the sport or activity of climbing mountains.

ski moun•tain•neer•ing | skɪ ,mountn 'i(ə)ri nɔ|

noun:

the sport or activity of climbing mountains, closing vents, then descending at speeds of **40+ MPH**

"dont ski fast....Fly-Low"

The new **Drop Kick™** pant is an evolution in ski pants. Just as the top skiers are integrating big air with freeriding, this tele-oriented pant mixes freedom of movement with superior venting and durability.

KEY FEATURES INCLUDE:

- Bellow wove nylon 69 staple fiber **Delonax Bomber™** with moisture backing from **Teryx™**, providing a fabric that is both comfortable and extremely abrasion resistant.
- 2000 Dacron neobutyl coated nylon **Cordura™** (made in the USA) on the cuffs and knees for the best reinforcement in high impact areas.
- Three point **Articulated knees** for freedom of movement and ideal kneepad fit.
- Adjustable elastic fit system integrated into the waistband for variable sizing without any bulk.
- Zener (creasing 9" up from mid knee) and 18" outer leg vents for **ultimate climate control** and **kneepad access**.
- Light but durable mesh lining for snag-free layering and to protect our waterproof membrane from the inside out.
